

For me, being completely new to coding, it was a good introduction to computer programming. I've had a career break for the past 12 years and I was not sure where to start from. I am really glad I took this course. I can now make better decision for choosing my next carrier path.

I enjoyed the lectures every Tuesday as they were quite interactive. Also the materials provided for self study were more than enough for doing the assignments.

I owe gratitude to my Python instructors, Anubhaw Ayra and Julian Peterson, for their exceptional mentorship and support.
